

Preporučeni domaći članci o suši, vodnim resursima i niskim vodostajima

Izbor domaćih medijskih sadržaja namenjenih edukativnom informisanju građana o suši, posledicama po poljoprivredu, merama prilagođavanja, navodnjavanju, hidrološkoj suši i niskim vodostajima tokom prethodnih godina.

1. Suša i posledice po poljoprivredu

- **N1 – „Blagojević: Zbog toplotnih talasa i suše najugroženiji kukuruz i soja“ (23.08.2026.)**

Članak govori o uticaju višegodišnjeg nedostatka padavina, suše i toplotnih talasa na poljoprivrednu proizvodnju u Srbiji. Posebno su obrađene posledice po kukuruz i soju, ali i suncokret, povrtarske i voćarske kulture. Objasnjene su razlike između meteorološke, poljoprivredne i hidrološke suše, uključujući uticaj dugotrajne suše na smanjenje nivoa podzemnih voda. Posebna pažnja posvećena je značaju navodnjavanja i potrebi prilagođavanja poljoprivredne proizvodnje klimatskim promenama.

<https://n1info.rs/biznis/toplotni-talasi-i-susa-ugrozavaju-kukuruz-i-soju/>

- **RTV – „Suša desetkovala rod kukuruza u Vojvodini – stručnjaci upozoravaju na posledice po cene mesa“ (03.09.2026.)**

Posledice suše na kukuruz i soju u Vojvodini i šire ekonomske posledice.

https://www.rtv.rs/sr_lat/vojvodina/susa-desetkovala-rod-kukuruza-u-vojvodini-strucnjaci-upozoravaju-na-posledice-po-cene-mesa_1740567.html

- **RTV – „Suša u Vojvodini prepolovila rod“ (17.08.2026.)**

Uticaj visokih temperatura i nedostatka padavina na prinose i tržište hrane.

https://rtv.rs/sr_lat/vojvodina/galetin-steta-je-vec-nepopravljiva-susa-u-vojvodini-prepolovila-rod_1736747.html

- **RTV – „Suša uzela danak: Soja podbacila, kukuruz čeka žetvu“ (21.08.2026.)**

Posledice suše na različite ratarske kulture.

https://www.rtv.rs/sr_lat/ekonomija/aktuelno/susa-uzela-danak-soja-podbacila-kukuruz-ceka-zetvu_1737793.html

- **RTV – „Suša ubrzala žetvu suncokreta u Kikindi, prinosi rekordno niski“ (21.08.2026.)**

Lokalni primer posledica suše u severnom Banatu.

https://www.rtv.rs/sr_lat/vojvodina/banat/susa-ubrzala-zetvu-suncokreta-u-kikindi-prinosi-rekordno-niski_1737704.html

- **RTV – „Svaki dan bez kiše nova briga za paore – suša ugrozila čuvenu begečku šargarepu“ (27.08.2026.)**

Lokalni primer uticaja suše na povrtarsku proizvodnju u Begeču.

https://gruvanje.rtv.rs/sr_lat/vojvodina/backa/svaki-dan-bez-kise-nova-briga-za-paore-susa-ugrozila-cuvenu-begecku-sargarepu_1738908.html

- **RTV – „Suša u riđičkom vinogorju – manje grožđa, ali slađeg zrna za vrhunska vina“ (25.08.2026.)**
Primer različitog odgovora poljoprivrednih kultura na sušu.
https://rtv.rs/sr_lat/vojvodina/backa/susa-u-ridjickom-vinogorju-manje-grozdja-ali-sladjeg-zrna-za-vrhunska-vina_1738351.html
- **Danas – „Suša u Srbiji spaljuje kukuruz, od repe na nekim njivama ostale samo rupe“ (31.07.2026.)**
Konkretni primeri posledica suše, uključujući Kisač i južnu Bačku.
<https://www.danas.rs/vesti/ekonomija/poljoprivrednici-susa-u-srbiji-spaljuje-kukuruz-od-repe-na-nekim-njivama-ostale-samo-rupe/>
- **Danas – „U delovima Banata ekstremna suša: Bez dovoljno kiše u junu, ratari nemaju čemu da se nadaju“ (04.06.2026.)**
Deficit padavina i posledice po ratarsku proizvodnju.
<https://www.danas.rs/vesti/ekonomija/susa-poljoprivrednici-ratari-kukuruz-psenica-kisa-prinosi/>
- **RTV – „Teška godina za poljoprivrednike – suša, nagle promene vremena i visoki troškovi proizvodnje obeležili sezonu na njivama“ (27.12.2025.)**
Pregled uticaja klimatskih uslova na više poljoprivrednih kultura.
https://www.rtv.rs/sr_lat/vojvodina/teska-godina-za-poljoprivrednike-susa-nagle-promene-vremena-i-visoki-troskovi-proizvodnje-obelezili-sezonu-na-njivama_1681550.html

2. Prevencija, navodnjavanje i prilagođavanje suši

- **RTS – „Bitka protiv suše – mogu li novi sistemi za navodnjavanje da sačuvaju srpske njive“ (30.06.2026.)**
Navodnjavanje i razvoj infrastrukture kao odgovor na sve izraženiji rizik od suše.
<https://www.rts.rs/lat/vesti/ekonomija/5985185/bitka-protiv-suse--mogu-li-novi-sistemi-za-navodnjavanje-da-sacuvaju-srpske-njive.html>
- **RTV – „Ekstremna suša ugrozila kukuruz, navodnjavanje čuva rod“ (12.08.2026.)**
Praktičan primer značaja navodnjavanja u uslovima ekstremne suše.
https://www.rtv.rs/sr_lat/ekonomija/aktuelno/ekstremna-susa-ugrozila-kukuruz-navodnjavanje-cuva-rod_1735596.html
- **RTV – „Suša iziskuje alternativna rešenja – proteinski sirak kao zamena za kukuruz“ (01.09.2026.)**
Primer prilagođavanja izborom kultura otpornijih na deficit vode i visoke temperature.
https://gruvanje.rtv.rs/sr_lat/vojvodina/banat/susa-iziskuje-alternativna-resenja-proteinski-sirak-kao-zamena-za-kukuruz_1740010.html
- **RTS – „Bunari u njivama rešenje za sušu“ (29.07.2025.)**
Primer navodnjavanja i odgovora poljoprivrednika na sušu u Kisaču.
<https://www.rts.rs/lat/vesti/srbija-danas/5759787/bunari-u-njivama-resenje-za-susu.html>

- **RTS – „Sušić o suši: Ovakvi uslovi su elementarna nepogoda, ali postoje načini da ratari to preduprede“ (18.08.2022.)**

Edukativno objašnjenje posledica nedostatka vode za biljke i mogućih mera poljoprivrednika.

<https://www.rts.rs/lat/vesti/drustvo/4925099/susa-usevi-posledice.html>

- **021 – „RHMZ: Ekstremna suša i toplotni talas ugrožavaju useve u Vojvodini“ (12.08.2026.)**

Agrometeorološka upozorenja i praktične preporuke u uslovima ekstremnih temperatura.

<https://www.021.rs/info/vojvodina/452118/rhmz-ekstremna-susa-i-toplotni-talas-ugrozavaju-useve-u-vojvodini>

3. Niski vodostaji i hidrološka suša tokom 2026.

- **RTS – „Istorijski nizak vodostaj Dunava ugrožava plovidbu i ekosistem“ (29.07.2026.)**

Posledice niskog Dunava po plovidbu, ekosisteme, kvalitet vode, hidrosistem DTD i navodnjavanje.

<https://www.rts.rs/lat/vesti/srbija-danas/6009112/istorijski-nizak-vodostaj-dunava-ugrozava-plovidbu-i-ekosistem.html>

- **RTS – „Ekstremno nizak nivo Dunava, ugrožena plovidba i biljni i životinjski svet – hidrolog otkriva šta nas čeka u avgustu“ (30.07.2026.)**

Stručno objašnjenje nastanka ekstremno niskih vodostaja i njihovih posledica.

<https://www.rts.rs/lat/vesti/drustvo/6009420/ekstremno-nizak-nivo-dunava-ugrozena-plovidba-i-biljni-i-zivotinjski-svet---hidrolog-otkriva-sta-nas-ceka-u-avgustu.html>

- **021/BBC – „Zašto je Dunav toliko nizak baš ove godine“ (04.08.2026.)**

Edukativno objašnjenje veze između padavina, snega u Alpima i vodostaja Dunava.

<https://www.021.rs/bbc/bbc/451241/zasto-je-dunav-toliko-nizak-bas-ove-godine>

- **RTV – „Istorijski nizak nivo Dunava nije ugrozio vodosnabdevanje Novog Sada, ali štednja je neophodna“ (06.08.2026.)**

Veza između niskog Dunava, izvorišta, vodosnabdevanja i racionalne potrošnje vode u Novom Sadu.

https://rtv.rs/sr_lat/vojvodina/novi-sad/istorijski-nizak-nivo-dunava-nije-ugrozio-vodosnabdevanje-novog-sada-ali-stednja-je-neophodna_1734350.html

- **RTV – „Dunav na istorijskom minimumu: Očekuje se dalji pad vodostaja, Vode Vojvodine preduzimaju mere“ (18.08.2026.)**

Konkretna mere upravljanja vodama tokom hidrološke suše.

https://www.rtv.rs/sr_ci/vojvodina/novi-sad/dunav-na-istorijskom-minimumu-ocekuje-se-dalji-pad-vodostaja-vode-vojvodine-preduzimaju-mere_1737072.html

- **RTS – „RHMZ: Vodostaji Dunava, Save i Tise narednih dana ispod niskih plovidbenih nivoa“ (24.08.2026.)**

Pokazuje da problem niskih vodostaja nije ograničen samo na Dunav.

<https://www.rts.rs/lat/vesti/drustvo/6025493/vodostaj.html>

- **RTV – „Suša pretil podzemnim vodama u Vojvodini“ (28.08.2026.)**

Povezuje sušu, nizak vodostaj Dunava, podzemne vode, izvorišta i vodosnabdevanje.

https://www.rtv.rs/sr_lat/vojvodina/novi-sad/susa-preti-podzemnim-vodama-u-vojvodini_1739369.html

4. Šire posledice suše i klimatskih ekstrema

- **RTS – „Suša uzima danak – rod kukuruza i soje ispod proseka, sa suncokretom bolje stanje“ (02.09.2026.)**

Povezuje sušu, poljoprivredne prinose, tržište i nizak vodostaj Dunava.

<https://www.rts.rs/lat/vesti/ekonomija/6030881/cene-poljoprivreda-rod-produktna-berza.html>

5. Istorijski pregled domaćih članaka o suši (2011–2024)

- **021 – „Neumoljiva statistika – suše u Srbiji sve učestalije“ (2017.)**

Koristan retrospektivni članak o sušama od 2011. godine. Posebno opisuje jaku i ekstremnu sušu 2011. u Vojvodini, sušnu jesen i vezu sa ekstremnom sušom 2012.

<https://www.021.rs/info/srbija/170841/neumoljiva-statistika-suse-u-srbiji-sve-ucestalije>

- **Politika – „Šest sušnih od poslednjih dvanaest godina“ (2012.)**

Pregled učestalosti suša u Srbiji, uključujući sušu 2011. koja je trajala tokom vegetacionog perioda i produžila se na jesen.

<https://www.politika.rs/sr/clanak/233029/Sest-susnih-od-poslednjih-dvanaest-godina>

- **RTS – „Navodnjavanjem do boljeg prinosa“ (06.07.2012.)**

Rani prikaz posledica visokih temperatura i nedostatka padavina 2012. godine i značaja navodnjavanja.

<https://www.rts.rs/lat/vesti/ekonomija/1134348/navodnjavanjem-do-boljeg-prinosa.html>

- **RTS – „Suša podiže cene“ (15.07.2012.)**

Povezuje sušu sa cenama voća i povrća i posledicama koje građani direktno osećaju na tržištu hrane.

<https://www.rts.rs/lat/vesti/ekonomija/1139512/susa-podize-cene.html>

- **RTS – „Suša – elementarna i skupa nepogoda“ (24.07.2012.)**

O štetama od velike suše 2012. u Vojvodini i Srbiji i predloženim merama pomoći poljoprivredi.

<https://www.rts.rs/lat/vesti/drustvo/1145258/susa---elementarna-i-skupa-nepogoda.html>

- **RTS – „Malo kiše – malo kukuruza“ (01.08.2012.)**

Edukativan primer veze između nedostatka padavina u kritičnim fazama razvoja kukuruza, prinosa i tržišnih posledica.

<https://www.rts.rs/lat/vesti/ekonomija/1149210/malo-kise---malo-kukuruza.html>

- **RTS – „Mere za ublažavanje posledica suše“ (23.08.2012.)**

Pregled državnih mera za ublažavanje posledica ekstremne suše 2012, uključujući podršku poljoprivrednicima i tržišne intervencije.

<https://www.rts.rs/lat/vesti/Ekonomija/1161336/Mere%2Bza%2Bubla%C5%BEavanje%2Bposledica%2Bsu%C5%A1e.html>

- **RTS – „Pouke sušne godine“ (27.08.2012.)**

Naglašava dugoročne pouke: ulaganje u navodnjavanje i izbor odgovarajućih sorti, hibrida i đubriva radi smanjenja posledica suše.

<https://www.rts.rs/lat/vesti/ekonomija/1163552/pouke-susne-godine.html>

- **RTS – „Šteta od suše veća od milijardu evra“ (07.09.2012.)**

Prikazuje ekonomske razmere ekstremne suše 2012. i odnos između šteta i potrebe za ulaganjem u navodnjavanje.

<https://www.rts.rs/lat/vesti/ekonomija/1169388/steta-od-suse-veca-od-milijardu-evra.html>

- **RTS – „Suša utiče na pripreme za setvu“ (17.09.2012.)**

Praktične preporuke za pripremu zemljišta i jesenju setvu nakon izrazito sušne godine.

<https://www.rts.rs/lat/vesti/ekonomija/1174724/susa-utice-na-pripreme-za-setvu.html>

- **RTS – „Od kupusa do sarme“ (28.10.2012.)**

Lokalni primer iz Futoga: posledice suše i visokih temperatura na proizvodnju kupusa, čak i uz navodnjavanje.

<https://www.rts.rs/lat/vesti/ekonomija/1200942/od-kupusa-do-sarme.html>

- **RTS – „Navodnjavanje jedini spas za useve“ (13.01.2013.)**

O sistemskim ulaganjima u navodnjavanje nakon velike suše 2012. i potrebi prilagođavanja klimatskim promenama.

<https://www.rts.rs/lat/vesti/Ekonomija/1246692/Navodnjavanje%2Bjedini%2Bspas%2Bza%2Buseve.html>

- **RTS – „Voćari očekuju stimulacije države“ (19.01.2014.)**

Posledice prethodne suše na voćarsku proizvodnju i potreba za sistemima za navodnjavanje i drugim ulaganjima.

<https://www.rts.rs/lat/vesti/Ekonomija/1499190/Vo%C4%87ari%2Bo%C4%8Dekuju%2Bstimulacije.html>

- **RTS – „Navodnjavanje – mera protiv suše“ (27.08.2017.)**

Jedan od ključnih članaka o suši 2017. i navodnjavanju u Vojvodini; govori o gubicima, sistemima i merama države.

<https://www.rts.rs/lat/vesti/ekonomija/2849963/navodnjavanje--mera-protiv-suse.html>

- **RTS – „U šabačkom kraju prepolovljen rod kukuruza“ (09.10.2017.)**

Primer posledica suše 2017. na kukuruz, stočarstvo i rizik od mikotoksina.

<https://www.rts.rs/lat/vesti/srbija-danas/2891919/u-sabackom-kraju-prepolovljen-rod-kukuruza-.html>

- **RTS – „Suša požnjela žitarice, neophodno ulaganje u sisteme za navodnjavanje“ (18.08.2021.)**

Povezuje sušu i ekstremne temperature sa padom prinosa i naglašava potrebu za širenjem navodnjavanja.

<https://www.rts.rs/lat/vesti/drustvo/4482618/susa-poznjela-zitarice-neophodno-ulaganje-u-sisteme-za-navodnjavanje.html>

- **RTS – „Ratari zabrinuti zbog tropskog talasa, strahuje se da će suša da desetkuje rod kukuruza“ (21.07.2022.)**

Povezuje sušu, toplotne talase, klimatske promene i potrebu prilagođavanja poljoprivredne proizvodnje.

<https://rts.rs/lat/vesti/ekonomija/4894048/ratari-zabrinuti-zbog-tropskog-talasa-strahuje-se-da-ce-susa-da-desetkuje-rod-kukuruza.html>

- **RTS – „Navodnjava se samo 72.000 hektara od dva miliona u Vojvodini – gde je 'presušilo'“ (15.05.2023.)**

Posebno relevantan za Vojvodinu: stanje navodnjavanja, hidrosistem Dunav–Tisa–Dunav i ograničeno korišćenje raspoloživih voda.

<https://www.rts.rs/lat/vesti/ekonomija/5191354/navodnjavanje-dunav-tisa-dunav-kanal.html>

- **RTS – „Zbog suše kukuruz i suncokret posejani nikad ranije, kakve će biti posledice“ (2024.)**

Praktične preporuke za prilagođavanje suši kroz rok setve, izbor hibrida, gustinu sklopa i navodnjavanje.

<https://www.rts.rs/lat/vesti/ekonomija/5410932/zbog-suse-kukuruz-i-suncokret-posejani-nikad-ranije-kakve-ce-biti-posledice.html>

- **RTS – „Suša i visoke temperature sve više ugrožavaju proizvodnju hrane“ (2024.)**

Širi pregled uticaja klimatskih promena, suše i ekstremnih temperatura na ratarstvo, voćarstvo i proizvodnju hrane.

<https://www.rts.rs/lat/vesti/ekonomija/5492521/susa-poljoprivreda.html>

Recommended Serbian Media Articles on Drought, Water Resources and Low Water Levels

A selection of Serbian media content intended to educate citizens about drought, impacts on agriculture, adaptation measures, irrigation, hydrological drought and low water levels during 2026, complemented by a historical overview from 2011 onward.

1. Drought and its impacts on agriculture

- **N1 – “Blagojević: Corn and Soybean Most at Risk Due to Heatwaves and Drought” (23 August 2026)**

The article discusses the impacts of prolonged precipitation deficits, drought, and heatwaves on agricultural production in Serbia. Particular attention is given to the effects on corn and soybean, as well as sunflower, vegetable, and fruit production. It explains the differences between meteorological, agricultural, and hydrological drought, including the effects of prolonged drought on declining groundwater levels. The article also highlights the growing importance of irrigation and the need to adapt agricultural production to climate change.

<https://n1info.rs/biznis/toplotni-talasi-i-susa-ugrozavaju-kukuruz-i-soju/>

- **RTV – “Drought decimates maize yield in Vojvodina – experts warn of consequences for meat prices” (03.09.2026.)**

Impacts of drought on maize and soybean production in Vojvodina and the broader economic consequences.

https://www.rtv.rs/sr_lat/vojvodina/susa-desetkovala-rod-kukuruza-u-vojvodini-strucnjaci-upozoravaju-na-posledice-po-cene-mesa_1740567.html

- **RTV – “Drought halves crop yields in Vojvodina” (17.08.2026.)**

Impact of high temperatures and lack of precipitation on crop yields and the food market.

https://rtv.rs/sr_lat/vojvodina/galetin-steta-je-vec-nepopravljiva-susa-u-vojvodini-prepolovila-rod_1736747.html

- **RTV – “Drought takes its toll: Soybean underperforms, maize awaits harvest” (21.08.2026.)**

Impacts of drought on different field crops.

2. Prevention, irrigation and drought adaptation

- **RTS – “The battle against drought – can new irrigation systems save Serbia’s fields?” (30.06.2026.)**

Irrigation and infrastructure development as a response to the increasing risk of drought.

<https://www.rts.rs/lat/vesti/ekonomija/5985185/bitka-protiv-suse--mogu-li-novi-sistemi-za-navodnjavanje-da-sacuvaju-srpske-njive.html>

- **RTV – “Extreme drought threatens maize, irrigation preserves the crop” (12.08.2026.)**

A practical example of the importance of irrigation under extreme drought conditions.

https://www.rtv.rs/sr_lat/ekonomija/aktuelno/ekstremna-susa-ugrozila-kukuruz-navodnjavanje-cuva-rod_1735596.html

- **RTV – “Drought calls for alternative solutions – high-protein sorghum as a substitute for maize” (01.09.2026.)**

An example of adaptation through the selection of crops more tolerant to water deficits and high temperatures.

https://gruvanje.rtv.rs/sr_lat/vojvodina/banat/susa-iziskuje-alternativna-resenja-proteinski-sirak-kao-zamena-za-kukuruz_1740010.html

- **RTS – “Wells in fields as a solution to drought” (29.07.2025.)**

An example of irrigation and farmers' response to drought in Kisač.

<https://www.rts.rs/lat/vesti/srbija-danas/5759787/bunari-u-nijivama-resenje-za-susu.html>

- **RTS – “Sušić on drought: These conditions constitute a natural disaster, but there are ways farmers can prepare for them” (18.08.2022.)**

An educational explanation of the effects of water shortage on plants and measures farmers can take.

<https://www.rts.rs/lat/vesti/drustvo/4925099/susa-usevi-posledice.html>

- **021 – “RHMZ: Extreme drought and heatwave threaten crops in Vojvodina” (12.08.2026.)**

Agrometeorological warnings and practical recommendations under extreme temperature conditions.

<https://www.021.rs/info/vojvodina/452118/rhmz-ekstremna-susa-i-toplotni-talas-ugrozavaju-useve-u-vojvodini>

3. Low water levels and hydrological drought during 2026

- **RTS – “Historically low Danube water levels threaten navigation and the ecosystem” (29.07.2026.)**

Impacts of low Danube water levels on navigation, ecosystems, water quality, the Danube–Tisa–Danube hydrosystem and irrigation.

<https://www.rts.rs/lat/vesti/srbija-danas/6009112/istorijski-nizak-vodostaj-dunava-ugrozava-plovidbu-i-ekosistem.html>

- **RTS – “Extremely low Danube levels threaten navigation and wildlife – hydrologist explains what to expect in August” (30.07.2026.)**

Expert explanation of the causes of extremely low water levels and their consequences.

<https://www.rts.rs/lat/vesti/drustvo/6009420/ekstremno-nizak-nivo-dunava-ugrozena-plovidba-i-biljni-i-zivotinjski-svet---hidrolog-otkriva-sta-nas-ceka-u-avgustu.html>

- **021/BBC – “Why is the Danube so low this year?” (04.08.2026.)**

An educational explanation of the relationship between precipitation, snow in the Alps and Danube water levels.

<https://www.021.rs/bbc/bbc/451241/zasto-je-dunav-toliko-nizak-bas-ove-godine>

- **RTV – “Historically low Danube level has not endangered Novi Sad’s water supply, but conservation is necessary” (06.08.2026.)**

The link between low Danube levels, water sources, public water supply and rational water use in Novi Sad.

https://rtv.rs/sr_lat/vojvodina/novi-sad/istorijski-nizak-nivo-dunava-nije-ugrozio-vodosnabdevanje-novog-sada-ali-stednja-je-neophodna_1734350.html

- **RTV – “Danube at a historic minimum: Further decline expected, Vode Vojvodine takes measures” (18.08.2026.)**

Concrete water-management measures during hydrological drought.

https://www.rtv.rs/sr_ci/vojvodina/novi-sad/dunav-na-istorijskom-minimumu-ocekuje-se-dalji-pad-vodostaja-vode-vojvodine-preduzimaju-mere_1737072.html

- **RTS – “RHMZ: Water levels of the Danube, Sava and Tisa to remain below low navigation levels in the coming days” (24.08.2026.)**

Shows that the problem of low water levels is not limited to the Danube.

<https://www.rts.rs/lat/vesti/drustvo/6025493/vodostaj.html>

- **RTV – “Drought threatens groundwater in Vojvodina” (28.08.2026.)**

Links drought, low Danube water levels, groundwater, water sources and public water supply.

https://www.rtv.rs/sr_lat/vojvodina/novi-sad/susa-preti-podzemnim-vodama-u-vojvodini_1739369.html

4. Broader impacts of drought and climate extremes

- **RTS – “Drought takes its toll – maize and soybean yields below average, sunflower fares better” (02.09.2026.)**

Links drought, agricultural yields, the market and low Danube water levels.

<https://www.rts.rs/lat/vesti/ekonomija/6030881/cene-poljoprivreda-rod-produktna-berza.html>

5. Historical overview of Serbian media articles on drought (2011–2024)

- **021 – “Relentless statistics – droughts in Serbia are becoming more frequent” (2017.)**

A useful retrospective article on droughts since 2011. It specifically describes the severe and extreme drought of 2011 in Vojvodina, the dry autumn and the link to the extreme drought of 2012.

<https://www.021.rs/info/srbija/170841/neumoljiva-statistika-suse-u-srbiji-sve-ucestalije>

- **Politika – “Six drought years in the last twelve” (2012.)**

Overview of drought frequency in Serbia, including the 2011 drought, which lasted throughout the growing season and continued into autumn.

<https://www.politika.rs/sr/clanak/233029/Sest-susnih-od-poslednjih-dvanaest-godina>

- **RTS – “Better yields through irrigation” (06.07.2012.)**

An early account of the consequences of high temperatures and lack of precipitation in 2012 and the importance of irrigation.

<https://www.rts.rs/vesti/ekonomija/1134348/navodnjavanjem-do-boljeg-prinosa.html>

- **RTS – “Drought drives up prices” (15.07.2012.)**

Links drought with fruit and vegetable prices and the consequences directly felt by citizens in the food market.

<https://www.rts.rs/lat/vesti/ekonomija/1139512/susa-podize-cene.html>

- **RTS – “Drought – a natural and costly disaster” (24.07.2012.)**

On damage caused by the major 2012 drought in Vojvodina and Serbia and proposed measures to support agriculture.

<https://www.rts.rs/lat/vesti/drustvo/1145258/susa---elementarna-i-skupa-nepogoda.html>

- **RTS – “Little rain – little maize” (01.08.2012.)**

An educational example of the relationship between insufficient precipitation during critical stages of maize development, yields and market consequences.

<https://www.rts.rs/lat/vesti/ekonomija/1149210/malo-kise---malo-kukuruza.html>

- **RTS – “Measures to mitigate the consequences of drought” (23.08.2012.)**

Overview of government measures to mitigate the consequences of the extreme 2012 drought, including support for farmers and market interventions.

<https://www.rts.rs/lat/vesti/Ekonomija/1161336/Mere%2Bza%2Bubla%C5%BEavanje%2Bposledica%2Bsu%C5%A1e.html>

- **RTS – “Lessons from a drought year” (27.08.2012.)**

Highlights long-term lessons: investment in irrigation and selection of suitable varieties, hybrids and fertilizers to reduce drought impacts.

<https://www.rts.rs/lat/vesti/ekonomija/1163552/pouke-susne-godine.html>

- **RTS – “Drought damage exceeds one billion euros” (07.09.2012.)**

Shows the economic scale of the extreme 2012 drought and the relationship between losses and the need to invest in irrigation.

<https://www.rts.rs/lat/vesti/ekonomija/1169388/steta-od-suse-veca-od-milijardu-evra.html>

- **RTS – “Drought affects preparations for sowing” (17.09.2012.)**

Practical recommendations for soil preparation and autumn sowing following an exceptionally dry year.

<https://www.rts.rs/lat/vesti/ekonomija/1174724/susa-utice-na-pripreme-za-setvu.html>

- **RTS – “From cabbage to sarma” (28.10.2012.)**

A local example from Futog: impacts of drought and high temperatures on cabbage production, even with irrigation.

<https://www.rts.rs/lat/vesti/ekonomija/1200942/od-kupusa-do-sarme.html>

- **RTS – “Irrigation the only salvation for crops” (13.01.2013.)**

On systemic investment in irrigation following the major 2012 drought and the need to adapt to climate change.

<https://www.rts.rs/lat/vesti/Ekonomija/1246692/Navodnjavanje%2Bjedini%2Bspas%2Bza%2Buseve.html>

- **RTS – “Fruit growers expect government incentives” (19.01.2014.)**

Consequences of the previous drought for fruit production and the need for irrigation systems and other investments.

<https://www.rts.rs/lat/vesti/Ekonomija/1499190/Vo%C4%87ari%2Bo%C4%8Dekuju%2Bstimulacije.html>

- **RTS – “Irrigation – a measure against drought” (27.08.2017.)**

One of the key articles on the 2017 drought and irrigation in Vojvodina; discusses losses, systems and government measures.

<https://www.rts.rs/lat/vesti/ekonomija/2849963/navodnjavanje--mera-protiv-suse.html>

- **RTS – “Maize yield halved in the Šabac area” (09.10.2017.)**

An example of the impacts of the 2017 drought on maize, livestock production and mycotoxin risk.

<https://www.rts.rs/lat/vesti/srbija-danas/2891919/u-sabackom-kraju-prepolovljen-rod-kukuruza-.html>

- **RTS – “Drought takes its toll on cereals; investment in irrigation systems is essential” (18.08.2021.)**

Links drought and extreme temperatures with declining yields and emphasizes the need to expand irrigation.

<https://www.rts.rs/lat/vesti/drustvo/4482618/susa-poznjela-zitarice-neophodno-ulaganje-u-sisteme-za-navodnjavanje.html>

- **RTS – “Farmers concerned about tropical heatwave, fear drought will decimate maize yields” (21.07.2022.)**

Links drought, heatwaves, climate change and the need to adapt agricultural production.

<https://rts.rs/lat/vesti/ekonomija/4894048/ratari-zabrinuti-zbog-tropskog-talasa-strahuje-se-da-ce-susa-da-desetkuje-rod-kukuruza.html>

- **RTS – “Only 72,000 hectares out of two million are irrigated in Vojvodina – where has it ‘dried up’?” (15.05.2023.)**

Particularly relevant to Vojvodina: the state of irrigation, the Danube–Tisa–Danube hydrosystem and limited use of available water resources.

<https://www.rts.rs/lat/vesti/ekonomija/5191354/navodnjavanje-dunav-tisa-dunav-kanal.html>

- **RTS – “Because of drought, maize and sunflower were sown earlier than ever – what will the consequences be?” (2024.)**

Practical recommendations for drought adaptation through sowing dates, hybrid selection, crop density and irrigation.

<https://www.rts.rs/lat/vesti/ekonomija/5410932/zbog-suse-kukuruz-i-suncokret-posejani-nikad-ranije-kakve-ce-biti-posledice.html>

- **RTS – “Drought and high temperatures increasingly threaten food production” (2024.)**

A broader overview of the impacts of climate change, drought and extreme temperatures on field crops, fruit production and food production.

<https://www.rts.rs/lat/vesti/ekonomija/5492521/susa-poljoprivreda.html>
